Activities

Other Club/Activity

11, 12 School, Break, Year 6 hr/wk, 16 wk/yr Continue	Founder and Developer, PresidentialSchoolPrep is a non-profit tutoring organization led by students of Presidential School Tutored more than 15+ successful students from low-income families. Assisted them in applying to Presidential schools in Uzbekistan (acc.rate~1.0%)
--	--

Internship

10, 11, 12 School, Break 7 hr/wk, 14 wk/yr Continue	Software Engineer and Web Designer, Forage & Local Tech.Enterprise Experienced myself in a real Software Engineering team in a company. Contributed to open source. Designed the websites of a local enterprise.
--	---

Computer/Technology

9, 10, 11 School, Break, Year 9 hr/wk, 35 wk/yr Continue	Developer of 3D models and IT projects, "Dizipro" - one of the biggest 3D modelling organizations in the country Created and rendered more than 50 furniture models and modelled 3D infrastructure of reception of "Mikrokreditbank" (local bank).
---	--

Science/Math

11, 12 School 5 hr/wk, 30 wk/yr Continue	Founder and Tutor, Presidential School in Tashkent & Local Non-Profit Organization Founded Math club. Assisted 15+ junior students in their preparation for Math Olympiads and IGCSE exams. 90% of them achieved high results.
---	--

Student Govt./Politics

11, 12 School, Year 4 hr/wk, 26 wk/yr Continue	2x Minister of school IT department, Presidential School in Tashkent Organized 4 programming competitions. Consulted junior students in the programming classes and maintained the school's technological equipment.
---	--

Other Club/Activity

9, 10, 12
School, Break
6 hr/wk, 14 wk/yr
Continue

Founder of Youtube channel, Youtube

Educated students on "Scratch" by uploading fundamental videos. Got hundreds of positive feedback from followers and videos got nearly 100k views.

Other Club/Activity

12
Break
4 hr/wk, 13 wk/yr
Continue

Participant/Mentor, Aspect Program

Joined the Program to develop IT skills through lectures, mentor guidance, and hands-on projects, gaining a strong foundation in project creation,

Community Service (Volunteer)

10, 11, 12
School, Break
3 hr/wk, 35 wk/yr
Continue

Volunteer and Coordinator, Uzbekistan Volunteering Association and Digital.uz

Collaborated in different IT business forums, coordinated and registered the guests. Took part in 10+ Environmental Cleaning Procedures.

Athletics: Club

10, 11, 12
Year
4 hr/wk, 35 wk/yr
Continue

Football, Varsity Team Captain, Presidential School in Tashkent

Managed the football team and won national competitions. Organized 3 annual football leagues between senior and junior grades. Coached youthf.

Writing

Personal essay

Share an essay on any topic of your choice. It can be one you've already written, one that responds to a different prompt, or one of your own design.

I remember my first *abacus*, how I held it sliding the beads back and forth. To my mom watching it, it could look like a toy - rows of small and brown beads lined up in a neat column. That simple device she eventually bought for me was the tool that opened the world of mental arithmetics and forever changed the way I interact with the world around me.

Months into the mental arithmetics, as I was calculating simple totals of baskets of apples as homework assignments, I began to wonder: what if I could calculate not just sums but the very essence of my daily experiences? How many hours did I need to finish my homework? What is the number of outfit choices I can get from my 5 shirts and 3 pants? Or how could I split my allowance to save for the multidimensional Rubik's Cube I desperately wanted? I even imagined going to a restaurant, scanning the menu with its tantalizing prices, and mentally calculating the total cost of my order, including the tip, before the waiter even approached my table. However, this passion for numbers would soon be put to the test in an entirely new environment. Transferring to a new school was an intimidating experience, and making a friend felt challenging.

One day, I randomly decided to participate in a math olympiad without any preparation, purely for fun. The result, obviously, was far away from a medal, but I call it a win as I walked away with something more valuable - a friend. There were many more competitions with friends made across the country before I joined the one not for social bonding but for new skills. This competitive international math Olympiad, SINGA, took place in Malaysia in 2018 for which I spent seven to eight hours daily solving complex algebraic problems. Competing against two hundred best students from around the world meant sacrificing my sleep, missing my friends' birthdays, and staying up past midnight. While I only made it past the second stage out of three, it was all worth it since I learned the importance of consistency. A year later, I entered SASMO, a prestigious olympiad where I finally lived up to my promise to get a gold medal. This gold medal is now a symbol of every night I spent practicing, each celebration I had to miss, and countless hours of focus that kept me on track.

Looking back, I came to understand how much I relied on mathematics not just as a subject but as a tool to interact with the world around me. Mathematics helped me make sense of everyday responsibilities, from calculating how much to save to effectively planning a deadline schedule. It also has instilled in me a sense of perseverance and dedication: each problem I solve is a small step to larger success. But most importantly, mathematics taught me to connect with people through shared experiences. Friendships made along the way were similar to odd and even numbers - we constantly complimented each other, creating relationships others often overlook.

Additional information

In Uzbekistan, school education lasts 11 years, and there is no specific definition of high school. As a result, I have aligned each high school grade in the U.S.A. (9–12) with the corresponding Uzbek year: U.S. 9th = Uzbek 8th, U.S. 10th = Uzbek 9th, etc.

In Uzbek schools, there are no credits. Unlike the American system, classes have a set number of hours mandated by the government. Consequently, our GPA cannot be weighted under any circumstances, which is a significant disadvantage if the person grading is unaware of the circumstances of long hours, etc.

This variation is also reflected on the AS & A Level curriculum. Annually, students in computer science SL spend an average of 75 hours. While our 10th grade computer science had 160 hours of lessons in one year (with the number increasing in year 2).

Cornell University questions

General

Student status	Degree-Seeking Student
Preferred start term	Fall 2025
Admission plan	Early Decision
Early Decision Agreement	Yes, I have read and understand my rights and responsibilities under the Early Decision Process. I wish to be considered as an Early Decision candidate at Cornell University. I also understand that with an Early Decision offer of admission, this institution may share my name and my early commitment with other institutions. Saidamirkhon Yusupov
Previously applied	No
Financial aid	Yes
Enrolled in American Indian Tribe	No
Specific Fee Waivers	Yes, I am eligible for a fee waiver as outlined in the profile section of the Common Application.

Fee Waivers

Household Income Below 75k	Yes
Public Assistance Eligible	No
Ward Eligibility	No

Academics

College or School to which you are applying:	Arts and Sciences
Anticipated major within the college/school you've chosen:	Computer Science
Second Choice Major (Arts & Sciences only)	Mathematics
Milstein Program	Yes
Highest Math Level	The equivalent of one calculus class (e.g. AP Calculus AB)

Is English the main language of instruction at your high school?	Yes
Highest Foreign Language Course	Other
Foreign Language Beyond Level 3	Russian

Military

ROTC Only	No
